Building Trust in e-Workflow

Digitalisation has largely benefited government, financial institutions and enterprises in terms of efficiency and cost savings. Digital forms, documents, records, agreements and contracts can be easily exchanged and transacted online.

Proving the digital document's authenticity, integrity, authorship is of utmost importance. This can be addressed via Digital Signature based on PKI, an industry recognised standard for digital identities in use today for websites, machines, and people. Traditional signing requires physical presence, verification via the naked eye, and in some cases, multi page endorsement.

With **nSignCore**, signing can be done simply at your convenience and verification automated offline or online. Combined with a digital certificate issued by Netrust, Singapore's only Commercial Accredited Certificate Authority (CA), your digitally signed documents will be legally binding under the Singapore's Electronic Transactions Act.

nSignCore is part of **Netrust's nSign Digital Signing Suite**.
Go to www.netrust.net/nsign to explore each of the solution offerings.

In support of the Singapore Government's National Digital Identity (NDI) initiative, nSign has tightly integrated with **Sign with SingPass** to empower businesses and their customers to digitally sign on any document using their SingPass Mobile.

It is easy to integrate your business application with nSign through a simple web service API. It is interoperable and language agnostic. By sending a signing request with your document to **nSignCore**, based on your request instructions, **nSignCore** will route the document to either **nSignCore Desktop**, **nSignCore Mobile**, **nSignCore Online** or **nSignCore NDI**, and return the signed document back to your business application.

As a CA accredited by the Controller of CA, parties relying on Netrust certificates enjoy the benefits of evidentiary presumption under the Electronic Transactions Act in Singapore, and users are assured of the legality and security of their transactions.

COMPREHENSIVE nSIGN SOLUTION SUITE

The **nSignCore** solution suite comprises of **nSignCore**, **nSignCore Desktop, nSignCore Mobile, nSignCore Online** and **nSignCore NDI**.

	nSignCore	At the heart of the solution is nSignCore, a digital signing and signature verification engine fronted by a web API for single integration with your application - sending signing request to nSign Client and validation of digital signature.
	nSignCore DESKTOP	**nSignCore Desktop is a desktop application installed in desktop or laptop computer that works with hardware PKI token to provide strong PKI authentication and digital signing capabilities.**
	nSignCore MOBILE	nSignCore Mobile is a mobile application SDK supported on both iOS and Android that provides PKI authentication and digital signing capabilities on the go.
	nSignCore ONLINE	**nSignCore Online is a client-less web solution allowing digital signing and validation capabilities with securely stored and centrally managed users' keys.**
	nSignCore NDI	nSignCore NDI is an integrated solution with SingPass to empower businesses and their customers to digitally sign agreements using SingPass Mobile application.

Enable safe, secure, efficient and paperless workflow management with Netrust nSign Solution to improve productivity and save costs in your operations.

ABOUT NETRUST

Netrust is the first public CA (Certificate Authority) in Asia and Singapore's only Commercial Accredited CA. Established in 1997, it has been providing digital ID certificates widely used for secure authentication, secure VPN, secure email, digital signing and other applications. Private sector companies and Government agencies such as Building and Construction Authority, Singapore Land Authority and Land Transport Authority employ Netrust's PKI solution in their environment to enhance security and convenience, and to safely complete their electronic transactions on the Internet.
